

DirichletReg: Dirichlet Regression for Compositional Data in R

Marco J. Maier

Wirtschaftsuniversität Wien

Abstract

Full R Code for

Maier, M. J. (2014). DirichletReg: Dirichlet Regression for Compositional Data in R. Research Report Series/Department of Statistics and Mathematics, 125. WU Vienna University of Economics and Business, Vienna. <http://epub.wu.ac.at/4077/>

Keywords: Dirichlet regression, Dirichlet distribution, multivariate generalized linear model, rates, proportions, rates, compositional data, simplex, R.

4. Application examples

4.1. The Arctic lake (common parametrization)

```
> library("DirichletReg")
> head(ArcticLake)

  sand   silt   clay depth
1 0.775 0.195 0.030 10.4
2 0.719 0.249 0.032 11.7
3 0.507 0.361 0.132 12.8
4 0.522 0.409 0.066 13.0
5 0.700 0.265 0.035 15.7
6 0.665 0.322 0.013 16.3

> AL <- DR_data(ArcticLake[, 1:3])

> AL[1:6, ]

  sand      silt      clay
1 0.7750000 0.1950000 0.0300000
2 0.7190000 0.2490000 0.0320000
3 0.5070000 0.3610000 0.1320000
4 0.5235707 0.4102307 0.0661986
5 0.7000000 0.2650000 0.0350000
6 0.6650000 0.3220000 0.0130000
```

Code for Fig. 1 (left):

```
> plot(AL, cex = 0.5, a2d = list(colored = FALSE, c.grid = FALSE))
```

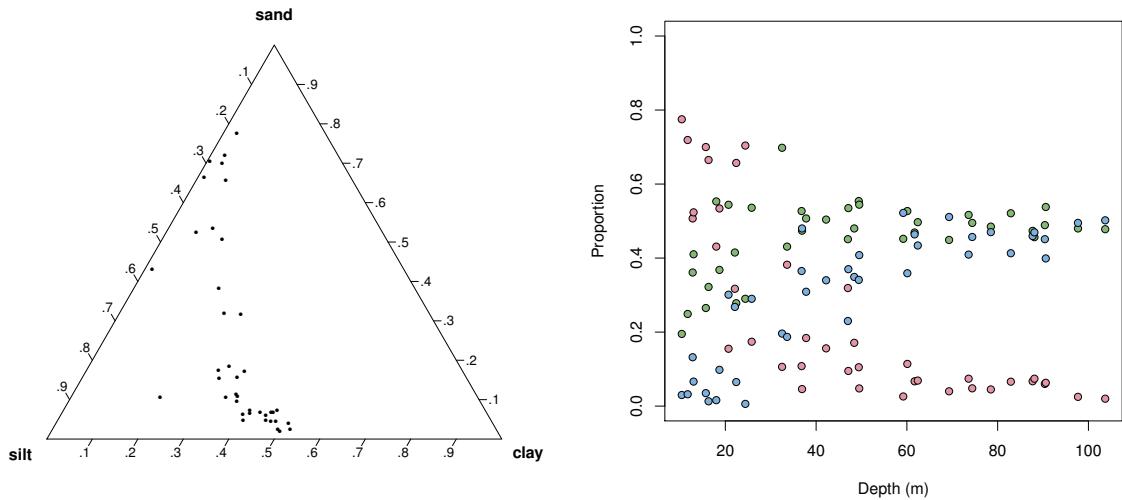

Figure 1: Arctic lake: Ternary plot and depth vs. composition.

Code for Fig. 1 (right):

```
> plot(rep(ArcticLake$depth, 3), as.numeric(AL), pch = 21, bg = rep(c("#E495A5",
+      "#86B875", "#7DB0DD"), each = 39), xlab = "Depth (m)", ylab = "Proportion",
+      ylim = 0:1)

> lake1 <- DirichReg(AL ~ depth, ArcticLake)
> lake1

Call:
DirichReg(formula = AL ~ depth, data = ArcticLake)
