# 1 Introduction

This document represents a test of the functions in **xtable** which deal with other packages.

The first step is to load the package and set some options for this document.

```
library(xtable)
options(xtable.floating = FALSE)
options(xtable.timestamp = "")
options(width = 60)
set.seed(1234)
```

## 2 The zoo package

```
library(zoo)

##
## Attaching package: 'zoo'
##
## The following objects are masked from 'package:base':
##
##      as.Date, as.Date.numeric

xDate <- as.Date("2003-02-01") + c(1, 3, 7, 9, 14) - 1
as.ts(xDate)
```

Time Series: Start = 1 End = 5 Frequency = 1 [1] 12084 12086 12090 12092 12097

```
x <- zoo(rnorm(5), xDate)
xtable(x)
```
